

## Pricing/Packages

First, we don't do cookie cutter price packages. All projects are as unique as your individual business and we take great care to match your needs with the right solutions for your business.

Pricing varies from project to project and also depends on the services you require, group members involved and project scope.

When you invest in your business by hiring Suite121 Web Design, we make recommendations based on our many years of experience. It's important we know your budget considerations up front so we don't waste your time.

Generally, our basic web site design packages start at \$799 and higher, depending on the needs of your business.

Ecommerce web site development starts at around \$1500 and usually requires monthly cart charges. However, using Joomla with a Virtumart shopping cart can provide a very cost effective online e-commerce solution.

We try to work within any budget to give our customers exactly what they want. Because we cannot determine the scope of the project until we know your specific needs, we only provide firm proposals after your project has been discussed.

### Hosting

Hosting is pretty simple. Our hosting is managed, which means we take care of everything; we just make it work. It costs \$20 per month or \$200 (SAVE \$40.00) for the year.

### Search Engine Optimization

Search Engine Optimization can be sticky business. At Suite121 we have had tremendous success building great web sites that are naturally search engine friendly. When combined with our SEO package your site is guaranteed to see a significant increase in traffic.

### Search Engine Optimization Package

Basic Search Engine Optimization requires a \$500 - \$1000 Set-Up Fee (depending on the number of key words optimized) and then \$50 - \$250 monthly fee. We will also include free hosting with the purchase of this package.
